Δ DELTA FILINGS

Corporate Governance Intelligence Platform — Executive Summary (v2)

The opportunity

Indian listed companies produce thousands of statutory disclosures every week across BSE, NSE and MCA. Investors, compliance officers and analysts spend the majority of their time collecting this data rather than acting on it. Delta Filings collapses that workflow into a single surface.

What v2 delivers

- Real-time filings from BSE + NSE with AI-generated summaries and materiality tags.
- Director records by DIN, with side-by-side Compare for relationship analysis.
- Compliance module — obligations, runs, evidence, audit-ready PDF export.
- Watchlists and alerts — instant, daily or weekly digest.
- Containerised stack (FastAPI + Next.js + Postgres + Redis) ready for paid tiers.

Launch targets (M6, Oct 2026)

Monthly Active Users	Filings Coverage	DIN Lookup p95
5,000	**≥ 98%**	**< 800 ms**

Why now

v1 shipped a prototype in 2025 that validated demand. v2 hardens the stack, adds the two most-requested modules (Compare + Compliance), and prepares for billing in Dec 2026. The architecture is horizontally scalable and ready for enterprise customers.

Ask

- Engineering sign-off on the v2 scope below.
- Budget commitment for managed Postgres, Redis and email infrastructure through Q4 2026.
- Two pilot customers committed to a 4-week UAT ahead of M6.
