Delta Filings

Corporate Governance Intelligence for Indian capital markets.

Investor Briefing • v2.0 • April 2026

Prepared by the Delta Filings Product Team

The problem

Data that matters is scattered, unstructured, and slow.

3

portals

BSE, NSE, MCA — three different UIs, three different data shapes.

1,000s

weekly disclosures

Manually tracked across PDFs and inconsistent tables.

60%

analyst time wasted

On collection instead of analysis. The real work is downstream.

0

structured director graph

No way to ask 'which boards share directors?' in under a minute.

Our solution

One surface for filings, directors and compliance.

Delta Filings ingests statutory disclosures in real time, summarises them with AI, enriches them with structured director data from MCA, and exposes everything through watchlists, search and compliance workflows.

Real-time filings

BSE + NSE, under 15 min lag.

Director graph

DIN lookup + Compare for up to three.

Compliance

Obligations, runs, audit-ready PDFs.

Alerts

Instant, daily or weekly digest.

Market

A large, under-served category in Indian capital markets.

Segment	Approx. Audience (India)	Who they are
Retail investors (active)	~40 M demat accounts	Tracking portfolios, reacting to news.
Equity research analysts	~8,000	Sell-side and buy-side, desk coverage.
Compliance officers	~5,000 (listed-company CS/compliance)	LODR, Companies Act, SEBI.
Legal / audit	~30,000 professionals	Diligence, forensic, audit.

Note: figures are directional estimates — final sizing to be refined ahead of pricing.

What it looks like

Five surfaces, one workflow.

Dashboard

Latest 50 filings across your watchlists, summarised and sentiment-tagged.

Announcements

Filterable feed with filing detail, source PDF and related filings.

DIN Search

Sub-second lookup with curated snapshot fallback.

Compare

Side-by-side view of up to three directors with common-board highlights.

Compliance

Obligations → runs → evidence → audit-ready PDFs.

Under the hood

Containerised, horizontally scalable, production-grade.

Frontend	Next.js 15 · React 18 · Tailwind
Backend	FastAPI · Python 3.12 · async SQLAlchemy
Database	PostgreSQL 16
Cache / Queue	Redis 7 (streams for jobs)
Auth	Supabase (email + Google)
AI	OpenAI (summarisation + classification)
Deploy	Docker Compose (dev) · container platform (prod)

Traction to date (v1)

A working prototype that proved demand.

1,200+	45k	~ 300	4.6 / 5
sign-ups on v1	DIN lookups served	companies watchlisted	pilot satisfaction score

v1 ran as a single-process Flask app. v2 is built for scale — the next numbers are ahead, not behind us.

Roadmap

From scaffold to paid tiers in eight months.

M1	May 2026	**Platform scaffold**	Stack up, auth, empty dashboard.
M2	Jun 2026	**Filings live**	BSE/NSE ingestion, AI summaries.
M3	Jul 2026	**Directors + DIN**	Lookup and Compare.
M4	Aug 2026	**Compliance**	Obligations, runs, evidence.
M5	Sep 2026	**Watchlists + alerts**	Email cadences, mute controls.
M6	Oct 2026	**Public launch**	Free tier open to all.
M7	Dec 2026	**Paid tiers**	Pro + Enterprise billing + SSO.

Business model

Freemium → Pro → Enterprise.

Free

₹ 0

- 3 watchlists
- Daily digest
- Basic DIN search

Pro

₹ 999 / month

- Unlimited watchlists
- Instant alerts
- Compare + exports

Enterprise

Custom

- SSO + team seats
- Compliance workflows
- API access + SLA

The ask

What we need from this room.

Capital

Seed round to fund v2 build-out through M7 (Dec 2026) and ramp GTM.

Introductions

Two to five pilot customers in listed-company compliance teams.

Advisory

Board advisor with regulatory / capital markets background.

Thank you.

Let's build the governance layer for Indian capital markets.
